You have solved algebraic equations for a couple years now, but now it is time to justify the steps you have practiced and now take without thinking... and acting without thinking is a dangerous habit!

The following is a list of the reasons one can give for each algebraic step one may take.

ALGEBRAIC PROPERTI	ES OF EQUALITY
ADDITION PROPERTY OF EQUALITY	If $a = b$ , then $a + c = b + c$
SUBTRACTION PROPERTY OF	If $a = b$ , then $a - c = b - c$
EQUALITY	
MULTIPLICATION PROPERTY OF	If $a = b$ , then $a \cdot c = b \cdot c$
EQUALITY	
<b>DIVISION PROPERTY OF EQUALITY</b>	If $a = b$ , then $\frac{a}{b} = \frac{b}{b}$
	If $u = b$ , then $\frac{-}{c} = \frac{-}{c}$
DISTRIBUTIVE PROPERTY OF	a(b+c) = ab + ac
MULTIPLICATION OVER ADDITION or	
<b>OVER SUBTRACTION</b>	a(b-c) = ab - ac
SUBSTITUTION PROPERTY OF	If $a = b$ , then b can be substituted for
EQUALITY	<i>a</i> in any equation or expression
<b>REFLEXIVE PROPERTY OF EQUALITY</b>	For any real number $a$ , $a = a$
SYMMETRIC PROPERTY OF	If $a = b$ , then $b = a$
EQUALITY	
TRANSITIVE PROPERTY OF	If $a = b$ and $b = c$ , then $a = c$
EQUALITY	

Complete the following algebraic proofs using the reasons above. If a step requires simplification by combining like terms, write *simplify*.

Given: 3x + 12 = 8x - 18Prove: x = 6

	Statements	Reasons
1.	3x + 12 = 8x - 18	1.
2.	12 = 5x - 18	2.
3.	30 = 5x	3.
4.	6 = x	4.
5.	<i>x</i> = 6	5.

Given: 3k + 5 = 17Prove: k = 4

	Statements	Reasons
1.	3k + 5 = 17	1.
2.	<i>3k</i> = <i>12</i>	2.
3.	k = 4	3.

Given: -6a - 5 = -95Prove: a = 15

Statements	Reasons

Given: 3(5x + 1) = 13x + 5Prove: x = 1

Statements	Reasons

Given: 7y - 84 = 2y + 61

Prove: y = 29

Statements	Reasons

Given: 4(5n+7) - 3n = 3(4n-9)

Prove: n = -11

Statements	Reasons

Given:  $4.7 \ 2f - 0.5 = -6 \ 1.6f - 8.3f$ 

Prove:  $y = -\frac{47}{616}$ 

Statements	Reasons

#### **Geometric Properties**

We have discussed the RST (Reflexive, Symmetric, and Transitive) properties of equality. We could prove that these also apply for congruence... but we won't. We are just going to accept it...

I know, you're disappointed.

PROPERTIES OF CONGRUENCE	
<b>REFLEXIVE PROPERTY OF</b>	For any geometric figure A, $A \cong A$ .
CONGRUENCE	
SYMMETRIC PROPERTY OF	If $A \cong B$ , then $B \cong A$ .
CONGRUENCE	
TRANSITIVE PROPERTY OF	If $A \cong B$ and $B \cong C$ , then $A \cong C$
CONGRUENCE	
Additional Reasons for Proofs	
DEFINITIONS	
POSTULATES	
PREVIOUSLY PROVED THEOREMS	
ALGEBRAIC PROPERTIES	

#### **Elementary Geometric Proofs**

### **Using Definitions**

Given:	$XY \cong BC$

Prove: XY = BC

Statements	Reasons

Given:	$\angle A \cong \angle Z$
Prove:	$m \angle A = m \angle Z$

Statements	Reasons

## Using the Transitive Property and Substitution

Given:  $m \angle 1 = 45^\circ$ ;  $m \angle 2 = m \angle 1$ 

Prove:  $m \angle 2 = 45^{\circ}$ 

Statements	Reasons

You should be aware that there are many ways to complete a proof. In fact, the following website has 79 distinct proofs for the most famous of all theorems, the Pythagorean Theorem.

http://www.cut-the-knot.org/pythagoras/index.shtml

Even the simple proof above could be done in at least two ways. The last statement could have been justified using SUBSTITUTION or the TRANSITIVE PROPERTY. These properties are similar, but no the same:

SUBSTITUTION works only on NUMBERS ( = ), while the TRANSITIVE PROPERTY can be used to describe relationships between FIGURES or NUMBERS ( = or  $\cong$ ). Keep this in mind.

Given:  $\angle 1 \cong \angle 2$ ;  $\angle 1 \cong \angle 3$ Prove:  $\angle 2 \cong \angle 3$ 

Statements	Reasons

## **Using Multiple Reasons**

- Given:  $m \angle A = 90^{\circ}$ ;  $\angle A \cong \angle Z$
- **Prove:**  $\angle Z$  is a right angle

Reasons

- Given:  $m \angle 1 = 90^{\circ}$ ;  $\angle 1 \cong \angle 2$ ;  $\angle 2 \cong \angle 3$
- **Prove:**  $\angle 3$  is a right angle

Statements	Reasons

- Given:  $m \angle O = 180^\circ$ ;  $m \angle P = m \angle S$ ;  $\angle O \cong \angle P$
- **Prove:**  $\angle S$  is a straight angle

Statements	Reasons

DEFINITIONS AND POSTULATES REGARDING SEGMENTS		
SEGMENT ADDITION POSTULATE	If $C$ is between $A$ and $B$ ,	
	then $AC + CB = AB$	
<b>DEFINITION OF SEGMENT</b>	If $\overline{AB} \cong \overline{CD}$ , then $AB = CD$	
CONGRUENCE		
<b>DEFINITION OF A SEGMENT</b>	A geometric figure that divides a	
BISECTOR	segment in to two congruent halves	
<b>DEFINITION OF A MIDPOINT</b>	A point that bisects a segment	
DEFINITIONS AND POSTULATES REGARDING ANGLES		
ANGLE ADDITION POSTULATE	If <i>C</i> is on the interior of $\angle ABD$ ,	
	then $m \angle ABC + m \angle CBD = m \angle ABD$	
<b>DEFINITION OF ANGLE</b>	If $\angle A \cong \angle B$ , then $m \angle A = m \angle B$	
CONGRUENCE		
<b>DEFINITION OF AN ANGLE BISECTOR</b>	A geometric figure that divides a	
	angle in to two congruent halves	

### **Proofs with Pictures**

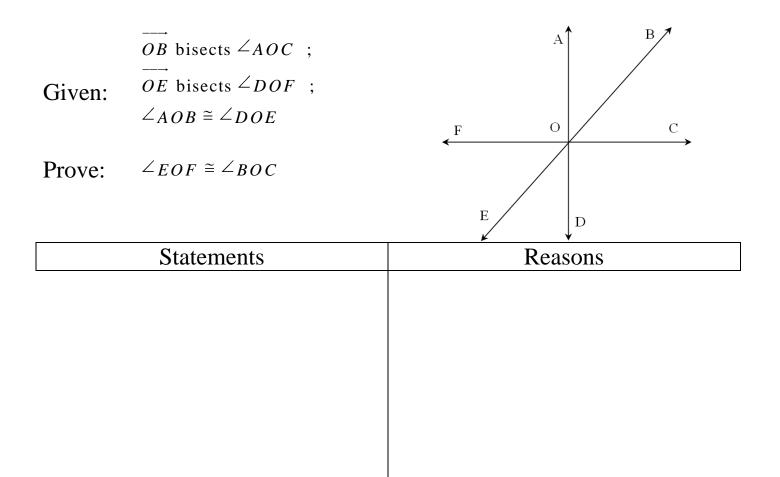

It is often much easier to plan and finish a proof if there is a visual aid. Use the picture to help you plan and finish the proof. Be sure that as you write each statement, you make the picture match your proof by inserting marks, measures, etc.

 E is the midpoint
 A
 B

 Given:
 of  $\overline{AC}$  and  $\overline{BD}$ ;  $\overline{ED} \cong \overline{EC}$  A

 Prove:
  $\overline{AE} \cong \overline{BE}$  C

Statements	Reasons	

# **Elementary Geometric Proofs**

# Segments

		R		S	Т
Given:	$\overline{RT} \cong \overline{WY}$ ; $\overline{ST} \cong \overline{WX}$	•			
Prove:	$\overline{RS} \cong \overline{XY}$	W	Х	•	Y
		•	•		•
	Statements		Reas	sons	

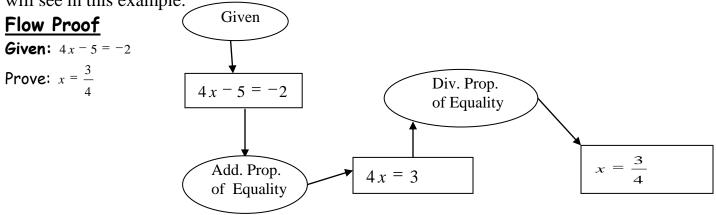

Given:	<i>O</i> is the midpoint of $\overline{NW}$ ;	Н	• W
	$\overline{NO} \cong \overline{OC}$	$\rightarrow$	
Prove:	$\overline{OC} \cong \overline{OW}$	N	C

	Statements		Reasons	
1.	O is the midpoint of $\overline{NW}$	1.		
2.	$\overline{NO} \cong \overline{OW}$	2.		
3.		3.	Given	
4.	$\overline{OC} \cong \overline{OW}$	4.		

Given:	$\overline{EF} \cong \overline{GH}$	EF GH
Prove:	$EG \cong FH$	
	Statements	Reasons
1.	$\overline{EF} \cong \overline{GH}$	1.
2.	EF = GH	2.
3. E	F + FG = GH + FG	3.
4. E	EF + FG = EG;	4.
G	H + FG = FH	
5.	EG = FH	5.
6.	$\overline{EG} \cong \overline{FH}$	6.

#### **Flow Proofs**

Proofs do not always come in two-column format. Sometimes they are more visual, as you will see in this example.

Complete the flow chart for the following proof.
